Berkeley Stainless Fittings Ltd

Skilled CNC Machine Setter/Operator

Location: Melksham, Wiltshire SN12 6RJ
Job Type: Permanent, Full Time – 40 hours per week
Shift: 8am – 4.30pm (flexi time available on request)

Berkeley Stainless Fittings Ltd is one of the UK's largest independent stockists and fabricator of hygienic stainless steel tube and fittings. With recent investment in state-of-the-art equipment, we are seeking to recruit a self-motivated and skilled CNC Machine Setter / Operator.

The CNC Setter Programmer will be responsible for producing high quality parts using a variety of different machines, tools and materials. You will also be responsible for maintaining the machines and keeping accurate records of production data.

Machines on hand: 3 CNC Lathe's (2 x Mazak and 1 x Siemens machines) and 2 CNC Mills (1 x Haas VMC and 1 x 5-axis Mazak).

Minimum 5 years of in-depth experience in CNC machining on Mazatrol or Fanuc operating systems is required.

Role expectations:

- Produce machined parts in line with provided Work Order, drawings, and other specifications.
- Interpret geometric dimensions and tolerances from drawings.
- Programming, setting up and operation of CNC machines.
- Quality inspection of parts during machining process.
- Monitor machine performance and make adjustments as necessary to ensure quality and efficiency.
- Conduct routine maintenance on CNC machines and troubleshoot issues to minimise downtime.
- Perform in-process inspections and use measuring instruments to ensure parts meet quality standards.
- Collaborate with the engineering team to address design and manufacturing challenges.

If you feel you have the necessary skills and experience to be successful in this role, please apply with an up-to-date copy of your CV. We would love to hear from you.

We would like the role to start as soon as possible but will wait for the right candidate so please get in touch.
